Education

03/2025 – 02/2027 Machang, Kelantan	Bachelor in Information System Management <i>Universiti Teknologi MARA</i> CGPA : 3.62
09/2022 – 02/2025 Machang, Kelantan	Diploma in Information Management <i>Universiti Teknologi MARA</i> CGPA : 3.4

Skills

Technical Skills

Programming Languages

- PHP
- JavaScript
- HTML
- CSS

Database

- MySQL
- SQL (CRUD operations, database design, normalization)

Web Development

- Full-stack web application development
- Responsive web design
- REST-style workflow (basic CRUD systems)

System Skills

- User authentication & authorization
- Session management
- System analysis & design (SDLC)
- Testing & debugging
- Administrative dashboard development

Frameworks & Tools

- Bootstrap
- XAMPP / Apache Server
- phpMyAdmin
- Visual Studio Code
- GitHub (Version Control)

Analytic

- Power BI
- SQL
- Excel

Soft Skills

- Problem-solving
- Team collaboration
- Time management
- Communication
- Attention to detail
- Critical thinking
- Documentation & reporting

Awards

03/2026

Dean List

Universiti Teknologi MARA

Maintained a high GPA (3.59) while managing rigorous coursework in [Information System Management], demonstrating strong analytical thinking, time management, and a commitment to academic excellence.

08/2025

Dean List

Universiti Teknologi MARA

Awarded for achieving an exemplary academic record (GPA 3.67) while consistently demonstrating strong research, analytical, and problem-solving skills.

Academic Projects

04/2026 – 06/2026

UiTM Talent Placement System

Universiti Teknologi MARA Talent Management

Technologies: PHP, MySQL, HTML, CSS, JavaScript

- Conducted requirements gathering and system analysis.
- Designed database structures using MySQL.
- Developed system workflows and user interface prototypes.
- Created modules for application submission, approval, and reporting.
- Applied software development lifecycle (SDLC) concepts throughout the project.

10/2025 – 12/2025

Flavour's Hub

Online Food Ordering & Loyalty Management System

Technologies: PHP, MySQL, HTML, CSS, JavaScript

- Developed a full-stack web application featuring secure user authentication, interactive menu browsing, order placement, and real-time order tracking.
- Integrated a gamified customer loyalty system complete with reward points, achievements, and leaderboards to drive user engagement.
- Built a comprehensive administrative dashboard to centralize the management of orders, user profiles, rewards, and system-wide activities.
- Designed and optimized a MySQL database to securely store and retrieve customer transactions, menu data, and loyalty metrics across responsive interfaces.

09/2025 – 11/2025

UiTM Students Withdrawal System

Student Withdrawal Management Portal

- Developed a web-based system to automate and streamline the student withdrawal process, successfully replacing manual, paper-based workflows.
- Engineered secure student/admin authentication and full CRUD functionalities to seamlessly manage student records and application statuses.
- Designed responsive user interfaces using Bootstrap and managed a relational MySQL database for secure data handling and retrieval.
- Followed full SDLC practices within a collaborative team environment, ultimately centralizing records to improve administrative efficiency.

08/2025 – 10/2025

Sport Facility and Equipment Booking System

UiTM Sport & Facilities Management

Technologies: PHP, MySQL, HTML, CSS, JavaScript, Tailwind

- Developed and deployed a centralized full-stack reservation system featuring secure multi-tier user authentication, dynamic scheduling, and responsive Bootstrap interfaces.
- Applied strict database transaction management adhering to **ACID properties** to maintain data integrity, enforce concurrency control, and eliminate resource allocation conflicts.
- Designed and optimized relational MySQL schemas with structured indexing for secure data handling, robust CRUD operations, and reliable historical logging.
- Engineered a comprehensive administrative dashboard that centralized record management, automated equipment inventory tracking, and streamlined usage reporting to improve operational efficiency.

08/2025 – 09/2025

Analysis on COVID-19 Cases in Selangor

Power BI & Data Analytic

- **Project Overview:** Developed a Power BI dashboard analyzing the spatial and temporal trends of COVID-19 cases in Selangor using public health data from Data.Gov.my [🔗](#).
- **4-Stage Data Pipeline:** Performed intensive **Data Cleaning, Processing, Transformation, and Reduction** to convert raw public records into structured, high-performance data models.
- **Spatial Statistical Modeling:** Formulated key performance metrics including the **LISA Index**, Cluster Types, and regional Incidence Rates to analyze distribution behavior.
- **Interactive Dashboarding:** Created interactive charts, spatial maps, and administrative control filters to facilitate data-driven hotspot detection and decision-making.

09/2025 – 10/2025

World Store

E-Commerce Web Application

- Developed a responsive online store website featuring user authentication and product browsing functionality.
- Designed user-friendly interfaces using HTML, CSS, and JavaScript.
- Applied responsive design, form validation, and front-end development best practices.
- Deployed and maintained the application using GitHub Pages.
